SUMMARY

Technical co-founder and CTO who designs, builds and operates software products end to end: architecture, infrastructure, payments and Mexican tax compliance, and AI agents in production.

EXPERIENCE

Bodego AI — Warehouse management system born with AI — Jan 2025 – Present
CTO — Monterrey

- Purchasing, inventory across warehouses, point of sale, online stores, B2B catalogs and marketplaces in one system.
- Built an AI assistant that works on each business's own data, also a connector for ChatGPT, Claude, Gemini and Grok.

Turboship — White-label shipping platform for Mexico — Nov 2023 – Present
Co-Founder & CTO — Monterrey

- Built Turboship, a white-label shipping platform integrating 13 carriers and 14 aggregators, deployed as an isolated instance for each reseller under its own brand, domain and rates.
- From Jul 2025 to Jul 2026 the network processed ~1.6M shipments for 852 businesses through 9 resellers (~$257.7M MXN billed).
- Owned payments and Mexican tax compliance (SPEI reconciliation, CFDI e-invoicing, Mercado Pago); an AI agent provisions each new reseller.

Octagon Labs — Studio that builds and operates its own software companies — Jan 2025 – Present
Co-Founder & CTO — Monterrey

- Built HQ, the studio's operations console: revenue reporting from each company, a shared lead database and the controls for its AI agents.
- Designed and run autonomous browser agents that find and qualify leads on Google Maps and Facebook: 7,549 leads across Mexico, Canada, Colombia and Brazil.
- Built EventKit (event ticketing with Wallet passes, QR check-in and an Android door scanner), FanKit (Wallet loyalty cards) and Timbra Chat (an agent that issues CFDI invoices from receipts).

Terpa Solutions — Payments for vending, micromarkets, parking and kiosks — Apr 2024 – Present
Technical Advisor (Aug 2026 – Present) · previously Head of Technology (Apr 2024 – Jul 2026) — Monterrey

- Built the multi-tenant platform that manages 1,300+ payment terminals across Mexico, with Openpay, Mercado Pago and CFDI integrations.
- Led the team building the Android apps on PAX and Sunmi terminals; set up release pipelines and crash reporting.
- Introduced AI-assisted code review and agent-based development practices to the team.

Caring · Software Engineer, Tech Lead — Partner Experience (contract) — Remote — Jan 2025 – May 2025
Able · Software Engineer, Tech Lead — Full-Stack Web (contract) — Remote — Nov 2021 – Dec 2024
PayPal · Software Engineer — Consumer Web Platform (contract) — Remote — Jan 2021 – Oct 2021
Independent · Remote Software Development & Consulting for US companies — Remote — 2014 – 2020

SKILLS

AI	Coding agents (Claude Code, Codex); Vercel AI SDK, OpenAI, Anthropic, OpenRouter; browser and tool-calling agents, document vision, structured outputs
Engineering	TypeScript, Next.js, React, Postgres, Redis, BullMQ, Socket.IO, Kotlin / Compose, React Native
Infrastructure	Linux servers, Docker, Cloudflare, Vercel, DigitalOcean, GitHub Actions
Payments (MX)	CFDI e-invoicing, SPEI reconciliation, Openpay, Mercado Pago
Languages	Spanish (native) · English (professional)
